They were raised on a very poor soil, without animal manure, and produced 245 bushels to the acre. Another kind which Mr. H. showed me is called the Goodrich, far superior to the Monitor. These come off the ground so early as to allow making another crop-ruta baga, a Swedish turnip. On poor land 230 bushels have been faised, and on rich land over 400 bushels per acre. Another kind which Mr. H. exhibited to me is called the Curco. On the same land 262 bushels were raised. A gentleman at Catawissa, as Mr. H informed me, on rich land, obtained four hundred bushela.

New for the treatment. The potatoes were all planted whole, of large size-three feet equal distance, covered six inches, and cultivated entirely flat-no billing being permitted at all. The crop was dug by hand with digging forks. Mr. H. regards the plow as the most wasteful implement for baryesting potatoes. As regards expense, if cost him twelve dollars per acre to dig, gather and store the crops named. No rot ever occurs under this system, and no failure of the crop. As high as thirty bushels per acre of seed were used of some large kinds. In storing, one pint of freshly slacked lime in powder is mixed with each bushel of potatoes. Any tendency to decay from cut or bruised tubers is entirely arrested Mr. H. plows and sub-soils deeply in the fall, and if the land is poor, manures on the surface and harrows in Iu the apring sub soils, harrows, rolls and marks out for corn. At the intersection of the furrows Mr. H opens six inches seep with the hoe, drops a whole potatoe, upon which he appiles a handful (fifty bushels per acre) of mineral compost of ful (fifty bushels per acre) of mineral compost of Commutation of Rations for Prisoners of War, or men wood, ashes, plaster, shell lime, bone dust (or on furlough, speedily obtained. It is noteworthy that his small potatoes average one tenth less than his crop. Mr. H. raised on 17-100 of an acre 490 baskets of tomatoes (three equal to two bushels,) which Azent.

is equal to 1.040 baskets or 600 bushels per acre. -They were raised on the same soil, manured with one shovelful of barn compost in the hill at the time of planting. Mr. H. was once a land surveyor and civil engineer, and his measure can be taken as authentic.

Mr. H finds seed growing so unprofitable that he don't grow them. Mr. H. undertook farming on a small scale two years ago, totally mexperienced. One year's practice extinguished all his faith in most of the traditions of agriculture. Mr. H. is his own

foreman, and does his own thinking and acting Prof. Siliman, who has traveled in Europe and the Pacific States, visited Mr. H.'s farm some time since and pronounced it equal to anything he had ever seen.

Mr. H's farm is situated on Queen lane, Germantown, Pa.

"Lock the door, John," she said. Now, if I were the only John in the world, I thought she knew me. I felt for the key, turned it in the lock without hestation, wondering at the same time what was coming next. Then an awful suspicion of some horrid trick fisshed upon my mond, I had often heard of infatuated men being lured to their destruction by pretty women, and I was on the point of opening the door when my lady struck a light. Then, to my diemay. I discovered that I was in a bed-room alone, with a strange woman. I said something; the lamp, looked, stared at me an instant, turned

THE Company holds by lease, and in fee, about twenty theusand acres of the most select coast lands in Western Iudiana, bordering both sides of the Wabash river. Maps of these lands may be seen at the office of the Company, in Covington, Ind., at the office of Wm. Dale, No. 25 Park Place, N. Y. City, at the office of Hon. J. R. Coffroth, Huntington, Indiana, and at the office of Roach & McDonald, Indianapolis.

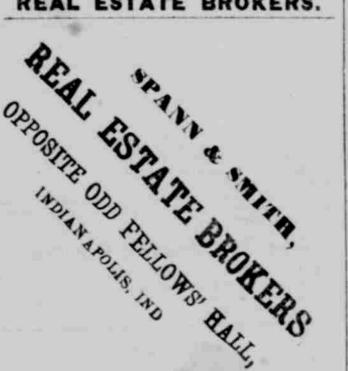

A reference to the report of the Hon. David Dale Owen, late State Geologist, will show that these lands are situate in the midst of the finest coal fields of the State, abounding also in salt, iron and other valuable

mineral substances. Near the mouth of Coal Creek, where the Company has large quantities of lands salt water has been discovered equal in quality to the Kanawha. This water was pro-cured some 35 years ago by boring, soon after, the On-ondaga salt finding its way down the Wabash and Erie Canal, Mr. Thomas, the proprietor, finding himself un-able to compete with it, abandoned the manufacture. In his boring he encountered that which recently disclosed facts prove to have been coal oil

Those lands all lie in close prox mity to the Wabash and Rrie Canal, some of them upon its banks. Mr. John McManomy, the business agent of the comregions of Pennsylvania, convinced that the lands leased | success. by the company, in Fountain and Parke counties, has, so far as the general formation of the country and the surface indications present themselves, a stong analogy in the oil and mineral substances as found on French Creek, Pennsylvania, where the greatest quantity and the most valuable oil is found. Mr. McManomy has purchased for the company the most approved machinery, with all the fixtures necessary for operation, and is preparing with experienced workmen the speedy develop-ment of the hidden treasure of the lands of the company. All the indices of coal oil, found in localities where it has been procured, are strongly marked in various lo-calities of the lands of the Company affording every rational prospect of success. The company thinks it unnecessary to make any other reference to the character of the lands, other than the report and map referred to \$100,000 of the stock, being 2,000 shares, is proposed by the Company to be offered in the market at one-half UNITED STATES EXPRESS COMPANY. its par value, being \$25 per share, for the purpose of aiding the Company in a speedy development of the

SYMPTOMS. TOR A CIRCULAR DESCRIBING ALL SYMPTOMS:

The symptoms of Catarrh, as they generally appear are at first very slight. Persons find they have a cold that they have frequent stracks, and are more sensitive to the changes of temperature. In this condition, the nose may be dry, or a slight discharge, thin and acrid, afterwards becoming thick and adhesive. As the disease becomes chronic, the discharges are increased in quantity and changed in quality; they are now thick and heavy, and are hawked or coughed off. The secretions are of-fensive, causing a bad breath; the voice is thick and nasal; the eyes are weak; the sense of the smell is lessened or destroyed; deafness frequently takes place. Another common and important symptom of Catarrh is, that the person is obliged to clear his throat in the morning of a thick or slimy mucus, which has fallen down from the head during the night. When this takes place the perungs, and should lose no time in arresting it. The above are but few of the many Catarrh symptoma.

the State of Illinois. FRESPORT, October 21, 1853. DR. D. H. SERLYE-Dear Sir: In reply to your notice of the 18th inst., I would say that I was severely afflicted with Catarrh for years, when I became acquainted with you and bought two bottles of your liquid Catarrh Remedy. Before I had used one bottle I was sensibly improved, and before the second bottle was finished, was completely cured. I can recommend the medicine to all afflicted with Catarrh. Respectfully yours,

THOMAS J. TURNER.
